Overview

This course is designed for site managers and assistant site managers working in the construction industry.

What you'll learn

You will study a range of key construction-related topics such as:

- Project planning (construction programmes, and product and production information)
- Health and safety (CDM regulations, risk assessments, method statements, and site inductions)
- Managing the technology of modern construction (foundations and superstructures)

- Managing sustainable construction (environmental impact assessments, sustainable construction options, and alternatives)
- Managing the quality of the site works (British standards, statutory requirements)
- Managing dimensional control on sites (surveying, setting out, and levelling) This course includes student membership of the Chartered Institute of Building.

Assessments / Exams

You will be continuously assessed throughout your studies. This includes written assignments, report writing, and presentations.

Entry requirements

To join this course you'll need:

- A level 3 trade qualification
- 3 years or management of supervisory experience
- English & Maths at level 2

Your interview will be carried out by a CIOB-accredited lecturer.

What this course leads to

*Progress to the Level 4 Diploma in Site Management

- Embark upon other higher education qualifications at Level 5 or above
- Enhance your employment in the construction industry
