Overview

Earn an internationally recognised IT qualification in computer networks which is developed by industry experts.

You will earn the skills to be able to troubleshoot, configure and manage systems. Get trained to work with a variety of hardware, software, and networks so that you can pursue a career as a network professional.

What you'll learn

The CompTIA Network+ course covers the technical skills needed to securely establish, maintain, and troubleshoot the important networks that businesses depend on. This course prepares and equips you with the knowledge and skills you require to be able to support networks on any platform. The specific skills covers are as follows:

Networking Fundamentals: Explain basic networking concepts including network services, physical connections, topologies and architecture, and cloud connectivity.

Network Implementations: Explain routing technologies and networking devices; deploy ethernet solutions and configure wireless technologies.

Network Operations: Monitor and optimize networks to ensure business continuity.

Network Security: Explain security concepts and network attacks in order to harden networks against threats.

Network Troubleshooting: Troubleshoot common cable, connectivity, and software issues related to networking.

Assessments / Exams

To achieve the CompTIA Network+ certification, you are required to register and complete the CompTIA Network+ Exam.

The exams will test your knowledge of networking fundamentals, network implementations, network operations, network security, and network troubleshooting.

For the latest exam details and costs, please refer to the CompTIA certification site.

A typical week

The course is taught using a blended learning approach, offering a highly interactive and engaging learning environment with video demonstrations, and multimedia presentations to assist with your study. There are also quizzes and exam simulations after each module to strengthen your confidence and aid progression to the next stage.

Entry requirements

CompTIA recommends having the CompTIA A+ certification or equivalent knowledge, and at least some experience in IT or a networking infrastructure environment.

What this course leads to

Upon successful completion of this course, you will receive a Certificate of Completion. Additionally, you will have the opportunity to pursue and acquire Industry Badges at no cost.

The CompTIA Network+ certification is the widely recognized industry standard for establishing a career in IT infrastructure covering troubleshooting, configuring, and managing networks. With a Network+ certification, you can become eligible for a diverse range of jobs in networking.

These jobs include:

- Network Administrator
- Computer Technician
- Network Field Technician
- Help Desk Technician
- Junior System Engineer
- System Engineer
- IS Consultant
- Network Support Specialist
- Network Field Engineer
- Network Analyst
