How do apprenticeships work?

If you prefer a more practical style of learning, an apprenticeship or higher apprenticeship could be the ideal option for you. They enable you to learn on the job and gain nationally recognised qualifications at the same time. [Find out more about apprenticeships.](#)

Overview

In collaboration with local community pharmacies this apprenticeship programme is designed to give you skills and knowledge within the pharmaceutical field.

What you'll learn

Pharmacy Technicians play a pivotal role in diverse healthcare settings, including registered pharmacies, community services, GP Practices, care homes, prisons, and hospitals. As a Pharmacy Technician, you will be responsible for managing the supply of medicines and devices, offering advisory services, and undertaking routine and specialist tasks with a high level of professional judgment. This apprenticeship integrates a Level 3 Diploma in the Principles and Practice for Pharmacy Technicians, aligning with the General Pharmaceutical Council (GPhC) guidelines.

Throughout the programme, apprentices will attend college one day a week for comprehensive lessons and receive visits from their tutor to their workplace.

Assessments / Exams

All apprenticeship standards include an end point assessment which is required to complete the standard.

Entry requirements

You will need to have GCSE Maths, English Language and two additional subjects at grade 4 (C) or above.

As part of the application process you will also be asked to explain why you want to study this course, so that we can ensure any course offer made aligns to your career goals.

What this apprenticeship leads to

Upon successful completion of the Level 3 Pharmacy Technician Apprenticeship, apprentices will be equipped to work in various pharmacy settings. The program serves as a stepping-stone for career progression, with many learners moving on to become Dispensing Technicians. This apprenticeship not only meets industry standards but also opens doors to a fulfilling career in healthcare.
