Overview

On this course you will have opportunity to investigate website design and plan as well as design and create your own website in response to a client brief.

You will also test and refine the website against the client brief and review your own performance.

What you'll learn

The core learning areas on this course will cover:

- Understanding website fundamentals
- Designing a website for an audience and purpose
- Planning documentation for a website in response to a client brief
- Creating a website in line with design proposal and planning documentation
- Test, review and refining a website for functionality and usability

Assessments / Exams

You will need to submit a portfolio of evidence to show your understanding and knowledge.

Entry requirements

There are no formal entry requirements for this course, but you may find it helpful to have already completed the L1 Award in Website Design.

What this course leads to

This qualification is designed to enable progression into further learning at the same level (e.g. from an award to a certificate in Digital and IT Skills) or to further learning at a higher level.
